

Ruwaidah Alfakhri

Cypress, TX — ruwaidah.riyadh@gmail.com — LinkedIn — GitHub — Portfolio

Software Developer | Full-Stack Developer | Applications & Data

PROFESSIONAL SUMMARY

Technical professional with a B.S. in Mathematics & Computer Science and hands-on experience designing, developing, testing, and troubleshooting full-stack applications. Skilled in JavaScript, TypeScript, React, Node.js, Express, REST APIs, PostgreSQL, SQL, Git, and automated testing. Experienced in relational database design, application debugging, root-cause analysis, system troubleshooting, and building reliable web applications. Strong analytical and problem-solving foundation with the ability to quickly learn new technologies, tools, and frameworks.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, HTML, CSS

Frontend: React, Next.js, Redux Toolkit, Tailwind CSS, Vite

Backend & APIs: Node.js, Express, REST APIs, Socket.io

Databases: PostgreSQL, SQL, Prisma ORM, Knex

Testing & Troubleshooting: Jest, Cypress, Playwright, Application Debugging, API Troubleshooting, Root Cause Analysis

Tools & Environments: Git, GitHub, VS Code, AWS, Cloudinary, Windows, Linux/UNIX

Additional: System Integration, Technical Documentation, Application Support, Network Troubleshooting, Computer Hardware

PROFESSIONAL EXPERIENCE

Fulfillment Team Lead

Mar 2024 – Sep 2026

Operations, Workforce & Systems Leadership

Cypress, TX

- Led daily fulfillment operations, coordinated team assignments and workload priorities, and monitored high-volume digital workflows to support timely completion of pickup and delivery orders.
- Used operational systems and performance dashboards to monitor processing speed, delayed and overdue orders, workflow exceptions, and service-level performance.
- Analyzed operational KPIs and drilled into department- and item-level data to identify trends, discrepancies, recurring issues, and root causes.
- Used Workday, GTA (Global Time & Attendance), and Workforce systems to review employee records, hours worked, overtime, PTO, and timekeeping data.
- Investigated and corrected inaccurate or missing time records and resolved system and data discrepancies while maintaining accurate workforce records.
- Troubleshoot operational technology issues and collaborated across teams to resolve system and workflow problems.
- Communicated performance results, technical and operational issues, priorities, and corrective actions to team members and leadership.
- Led daily team meetings and trained and onboarded 10+ team members on digital tools, operational procedures, workflow processes, and performance expectations.

Fulfillment Associate

Feb 2022 – Mar 2024

Operations

Cypress, TX

- Utilized handheld inventory software and digital tracking tools to maintain data accuracy and fulfill 100–200 orders daily.
- Identified system data mismatches and followed standardized technical troubleshooting steps to resolve order processing issues.

TECHNICAL PROJECTS

FulfillFlow – Order Operations Platform

Next.js, TypeScript, Node.js, PostgreSQL, Tailwind CSS

Live — GitHub

- Architected a full-stack web application orchestrating multi-channel order fulfillment across pickup, delivery, and shipping workflows with real-time state tracking.
- Engineered performant REST API endpoints using Node.js and PostgreSQL to execute order assignment algorithms, status transitions, and audit log history.
- Implemented frontend search, multi-param filtering, and responsive operational dashboards using Next.js and TypeScript.

Workforce Scheduling Application

React, Node.js, Express, PostgreSQL

Live — GitHub

- Developed a role-based scheduling management application handling weekly shift planning, leave requests, and employee shift swaps.
- Implemented complex business logic and validation algorithms on backend endpoints to prevent scheduling collisions and double-booking across draft/published shifts.
- Designed normalized relational database schemas in PostgreSQL utilizing Knex queries for efficient data retrieval.

Connect – Real-Time Messaging Platform

React, Node.js, Socket.io, PostgreSQL

Live — GitHub

- Built a full-stack real-time messaging application with persistent WebSocket connections via Socket.io for low-latency chat delivery and live active status updates.
- Secured user authentication and endpoint access control using JSON Web Tokens (JWT) and bcrypt password hashing.
- Integrated persistent state storage in PostgreSQL for user profiles, relational friend networks, and encrypted chat histories.

EDUCATION

Al-Nahrain University

Bachelor of Science in Mathematics & Computer Science

Baghdad, Iraq

CERTIFICATIONS & TRAINING

Springboard – Software Development Career Program	2024
Google / Coursera – Technical Support Fundamentals	2026
BloomTech (formerly Lambda School) – Full-Stack Web Development	2020
