

# Ruwaidah Alfakhri

Cypress, TX — ruwaidah.riyadh@gmail.com — LinkedIn — GitHub — Portfolio

**Software Developer — Full-Stack Developer — Application Support**

## PROFESSIONAL SUMMARY

Technical professional with a B.S. in Mathematics and Computer Science and hands-on experience developing, testing, and troubleshooting full-stack applications. Skilled in JavaScript, TypeScript, React, Node.js, Express, REST APIs, PostgreSQL, Git, and automated testing. Experienced in application and database debugging, deployment troubleshooting, and building reliable web applications.

## TECHNICAL SKILLS

- **Programming:** JavaScript, TypeScript, HTML, CSS
- **Frontend:** React, Next.js, Redux Toolkit, Tailwind CSS, Vite
- **Backend & APIs:** Node.js, Express, REST APIs, Socket.io
- **Databases:** PostgreSQL, Prisma ORM, Knex
- **Testing & Troubleshooting:** Cypress, Playwright, Jest, Application Debugging, API Troubleshooting, Root Cause Analysis
- **Tools:** Git, GitHub, VS Code, AWS, Cloudinary, Windows, Linux
- **Additional:** System Integration, Technical Documentation, Application Support, Network Troubleshooting, Computer Hardware

## TECHNICAL PROJECTS

- **FulfillFlow – Order Operations Platform** — *Next.js, TypeScript, Node.js, PostgreSQL* — Live — Frontend — Backend
  - Developed a full-stack order operations platform supporting pickup, delivery, and shipping workflows with status tracking, search, filtering, and activity history.
  - Designed REST APIs connecting the frontend, backend, and PostgreSQL database and implemented order assignment workflows.
  - Troubleshoot API, database, application, and deployment issues using systematic debugging and root-cause analysis.
- **Workforce Scheduling Application** — *React, Node.js, PostgreSQL* — Live — Frontend — Backend
  - Built a full-stack workforce scheduling system with role-based access control, weekly scheduling, time-off requests, and shift swaps.
  - Developed business rules for published and draft schedules, locked periods, and schedule conflict detection.
  - Integrated frontend components with backend APIs and PostgreSQL and tested application behavior across all layers.
- **Connect – Real-Time Messaging Application** — *React, Node.js, PostgreSQL, Socket.io* — Live — Frontend — Backend
  - Developed a real-time messaging application supporting authentication, profiles, friend requests, private messaging, and notifications.
  - Integrated Socket.io for real-time communication and PostgreSQL for persistent application data.
  - Troubleshoot authentication, API requests, database interactions, application state, and real-time communication issues.

## PROFESSIONAL EXPERIENCE

- **Fulfillment Team Lead** Mar 2024 – Sep 2026  
*Operations & Fulfillment* Cypress, TX
  - Analyzed operational issues and identified root causes to resolve workflow problems and maintain service performance.
  - Used digital systems and performance data to monitor operations, identify discrepancies, and support process improvements.
  - Trained team members on digital tools and procedures while providing ongoing troubleshooting and support.
  - Collaborated across teams to resolve issues, communicate priorities, and meet business requirements in a fast-paced environment.
- **Fulfillment Associate** Feb 2022 – Mar 2024  
*Operations & Fulfillment* Cypress, TX
  - Used mobile devices and digital systems to process workflows, maintain accurate records, and resolve operational exceptions.

## EDUCATION

- **Al-Nahrain University** Baghdad, Iraq  
*Bachelor of Science in Mathematics & Computer Science*

## CERTIFICATIONS & TRAINING

- **Google / Coursera** – Technical Support Fundamentals, 2026
- **Springboard** – Software Development Career Program, 2024
- **Lambda School** – Full-Stack Web Development, 2020
